## PROFILE:

Telecommunications and IT Engineer (Telematics) working as a QA Tester. Skilled in manual, automated testing and test plan creation. As a person I strive to be practical, proactive, disciplined and think outside the box. I ensure that testing activities allow applications to meet business requirements and systems goals, fulfill end-user requirements, and identify existing or potential issues.

## EMPLOYMENT HISTORY:

### Test Automation Engineer

Mphasis | October 2023 - Present

- The project was supposed to start but in the end it was cancelled and no one was informed beforehand. Now I have been on the bench waiting for another project.

### QA Engineer

Accion Labs | July 2022 - July 2023 (1 year)

- Assisted Quality Team with rollout of new **process, metrics** and **tools**.
- Agile testing, **SCRUM** as agile methodology and **JIRA/Xray** as bug test execution tool.
- **Selenium WebDriver** in **Python** to write testing automation code for a Cloud Web Service.
- **Cucumber** Framework as Behavior-Driven Development (**BDD**) in Agile Software Development
- **REST** and **SOAP API** test automation with **Postman**
- Kusto Query Language (**KQL**) and Structured Query Language (**SQL**) to perform database calls
- Manual testing for IoT devices. **Hardware testing** skills
- Created documentation such as **testing reports, bug reports, test plans** and **test cases**.
- Helped to implement a robust **automated regression**, lower environment **smoke test**, and production smoke test suites.

### Quality Analyst

Fyware | June 2021 - July 2022 (1 year)

- **Professional English skills** due to working with an international team from Germany, Mexico and other countries.
- Agile testing, **SCRUM** as agile methodology and **JIRA** as bug tracking tool.
- Used **Selenium** WebDriver in **Python** to write testing automation code for a platform.
- Used **Postman** to create testing automation for a backend API.
- Performance testing using **Android Studio, XCode, JMeter** and **GTmetrix**.
- **Develop 400+ test cases** for a web platform, an Android/iOS app and a backend API.
- Used **Robot Framework** to write testing automation code for a website

## SKILLS:

### Soft skills:

- Excellent **verbal/written** communication and data presentation skills.
- Strong **analytical skills**
- Strong **attention to detail**
- Excellent **analytical** and **problem-solving** skills
- Excellent working as a **team player**

### Hard skills:

- Excellent in **Manual testing**
- Very good in **Automation testing**
- Knowledge of test automation tools like **Cypress**, **Selenium** and **Postman**
- Performance testing with **JMeter**
- Operated in a fast paced and **agile environment**
- Excellent **reading requirements** for testability of user stories
- Excellent **Bug Reporting** & **Test Case** writing skills
- Knowledge of agile management systems like **JIRA** and **Azure DevOps**
- **API Test Automation**

---
